

Liverpool Cancer Research UK Centre

in celebration of

Black History Month

presents:

The Story of Henrietta Lacks

On 4th October 1951 a black American woman died of cervical cancer.

Her loving but impoverished family buried her in an unmarked grave.

Cells taken from her body before she died would change the course of medical research forever.

Her story is not widely known.

Scientists know her as HeLa, her name was Henrietta Lacks.

You are invited to attend an event to celebrate the contribution HeLa cells made to medical research. The event includes the opportunity to view HeLa cells in our laboratories and meet our scientists.

Liverpool Cancer Research UK Centre

200 London Road

Liverpool

L3 9TA

October 4th 2011

3– 5 pm

This event is free, but booking is essential. Please confirm your attendance by contacting CRUK LEAD Manager

Emma Squibb on 07770 597 185, or by email at
