

# Introduction to NICE

Sheryl Warttig

# Medtech at NICE

# Notification

- Companies can notify directly
  - [www.nice.org.uk/mt](http://www.nice.org.uk/mt)
- Low risk to companies
  - Initial NICE assessment: no obligation to NICE/company
  - Focus on developing positive outputs
  - Support innovation in medtech
- Companies can get advice on a potential notification
  - [medtech@nice.org.uk](mailto:medtech@nice.org.uk)

# Notification

Form asks for info on:

- Product
- Patient/population
- Place in a care pathway
- Benefits
- Evidence
- Costs
- Expert nominations

# Benefits

- Plausible and relevant for decision makers
- Relevant to UK care
- Important to people receiving care
- Talk to experts

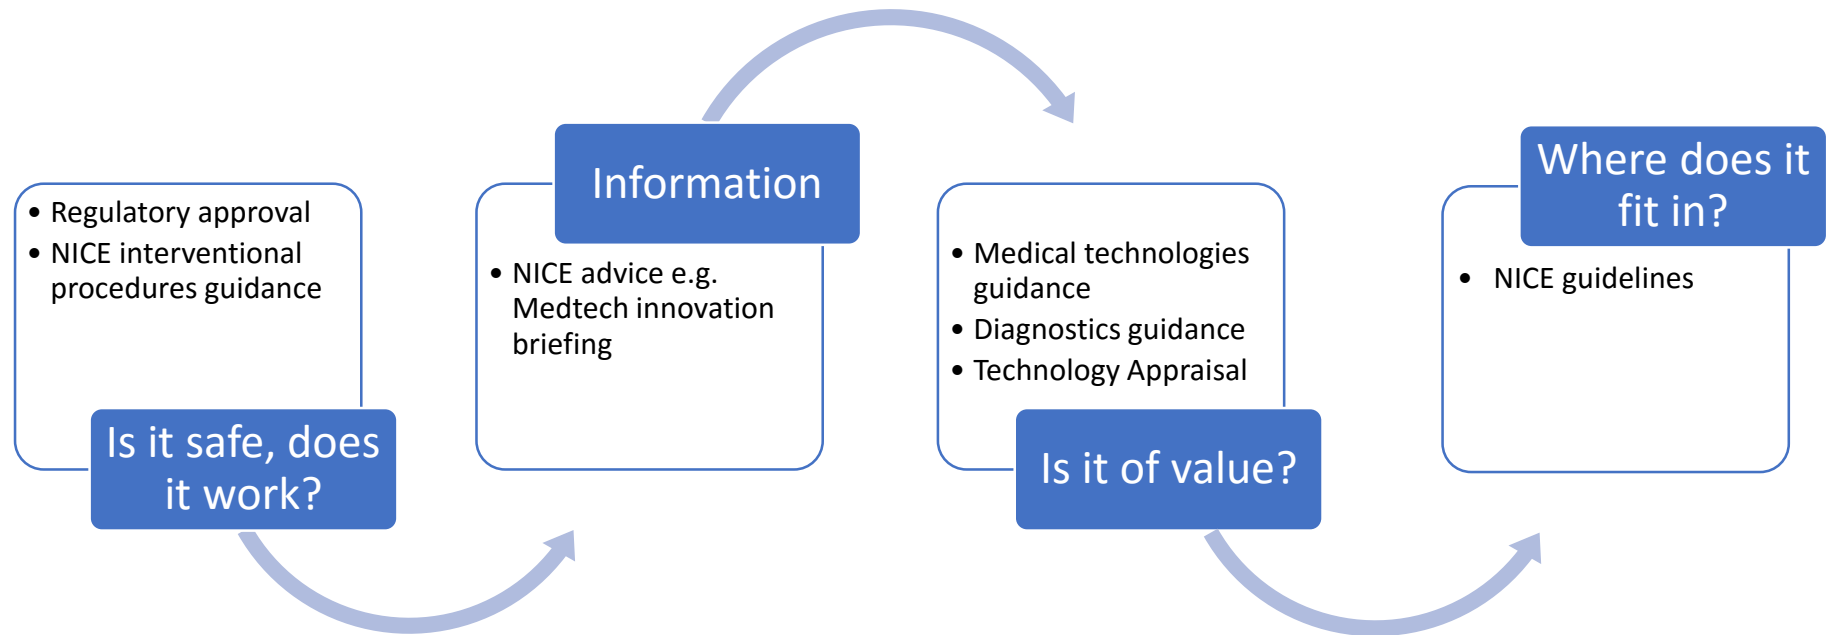

# Evidence

- Any evidence from any country
- No design/quality thresholds
  - Published and in-press research (academic/commercial in confidence)
  - Unpublished data
  - Real world data, register data, audits, post market surveillance
  - Forthcoming trial results
- Each technology/potential benefit assessed on case by case basis

# Topic selection

- Team work directly with companies throughout the process
- Team seek advice from experts
- Literature search
- Topic briefing developed to inform selection decision
- Non-selected topics can be re-notified

# A technology can be included in multiple outputs

# Not selected

- Intention is to develop positive outputs
- Not selected technologies
  - Receive feedback on reasons
  - Signposted
  - Can be renotified

# After guidance

- NICE develop resources to support the adoption of selected NICE guidance
- Research facilitation- when NICE guidance recommends further research
  - Designed to facilitate research to address gaps in evidence which led to research recommendations
  - Once research has been generated, guidance is usually updated.

# Office for Market access

[www.nice.org.uk/about/what-we-do/office-for-market-access](http://www.nice.org.uk/about/what-we-do/office-for-market-access)
