

**REDCap is a secure web application for building and managing online surveys and databases**

**The NWSTC can provide access to REDCap to support data capture for research studies**

- **Secure and individual user authentication & password-protected log in**
- **Multi-site access – can be completed by researchers from multiple sites and institutions**
- **REDCap mobile app available**
- **Regulatory compliance with a variety of standards (e.g. HIPAA, 21 CFR Part 11, FISMA) – can be personalised to meet local security requirements**

- **Fully customizable database or survey design**
- **Automated data downloads to Excel, PDF and common statistical packages (e.g. SPSS, SAS, Stata, R)**
- **Audit trails for tracking user activity**
- **Build an online survey or database from anywhere in the world**
